## Blue Print Reading

**Course Instructor: Larry Cantelo, PEC**

On many projects, especially large ones, many electricians and apprentices have very little opportunity to spend much time reading the blueprints. This, despite the fact that the ability to effectively navigate through a set of prints is an essential skill for any tradesperson. This twelve-hour course is intended for both people who have a limited amount of blueprint reading experience and for those who want to brush up on their skills. The bulk of the time in this course will be spent reading commercial blueprints and answering a series of quizzes pertaining to them. A series of short lectures will supplement the print-reading exercises. A brief introduction to specifications will also be provided as part of the course. At the end of the course participants will have the option to purchase the textbooks and blueprints used throughout the course.

*\*12 APD points for PEC's*

**TUESDAY, NOV 21<sup>st</sup> & 28<sup>th</sup> & THURSDAY, NOV 23<sup>rd</sup> & 30<sup>th</sup> 2017**

**ECAA Provincial Office (17725 - 103 Avenue, Edmonton)**
