Welcome to ECAA's E-Newsletter, The Spark!

This e-newsletter was created to keep members and industry informed on the Association's activities and upcoming events in a timely manner.

President's Message

Happy New Year everyone! I hope you all had a great holiday season and got some down time! With a new year and a new decade come hopeful expectations that the economy will pick up and we all get back to what we do best!

The Provincial Board held their meeting on December 6th in Calgary. It was filled with spirited dialogue from everyone in attendance. On December 7th Calgary hosted their annual Christmas social. It was a sold out event and a great time. Great job Chris Jardine and the Calgary Chapter members. I had a great time! Thanks. There were 25 members that volunteered their time at the North East Relocation Centre in Calgary on Saturday December 7th just ahead of the Calgary social. The ECAA annual open house was held on December 12th at the Provincial Office with many members and special guests attending. This well-attended event was a great time to get to know your peers!

In the New Year there is a lot of work ahead of us. As a Board, we will try to bring our Members and Associates, as well as everyone in the electrical industry up to speed with what the Government has on the agenda for 2020, as we have a couple meetings with them in the future! The next Board meeting is January 24th, 2020 at the ECAA office. Don't forget the Edmonton Chapter President's Ball on January 25th, hosted by Jason Kuziw and the Edmonton Executive!

The 2020 out of country convention is quickly approaching, with departure on February 1st, 2020. I hope everyone will enjoy this time with my wife and I, as well as the great guests and speakers that are attending.

Thanks, that's all for this message!

Stay true to yourself and be ethical for the industry.

Alberta Fire Alarm Training Course February 24th - 28th, 2020 (ECAA Provincial Office, Edmonton, AB) This is an Alberta specific fire alarm course for Electricians. This course meets the requirement for those journeypersons who wish to apply for a personal identification number (PIN) for the maintenance of Fire Alarm Systems, as well as a refresher course for those working in the field. Alberta Electricians certified prior to 1991 as well as journeypersons with credentials from out-of-province will be eligible to receive a PIN upon successful completion of the exam. For more information click on [Fire Alarm Course Registration Form To register online: https://events.ecaa.ab.ca/events/ab-fire-alarm-training-course-february-2020/](#)

New Process for Applying for Electrical Permits (RMWB): Effective 2020, Regional Municipality of Wood Buffalo will be setting up a new procedure to have an Authorization form outlining all the companies that you are a "Signing Master" for. Permitting Clerks will be contacting you if you have an application come forward with your name on it and the Authorization isn't on file. The intent of this change is to provide protection for the "signing Master" as to which companies they are ultimately responsible for when their name is used on an application and to help prevent any fraudulent use of their name on an application. 2020 ECAA Technical Training Day

ECAA's Training Day & AGM will be held May 29th & 30th, 2020 at the JW Marriott downtown Edmonton. Here is a highlight of one of our presentations:

Correlation between Sections 4 & 8 in the CE Code

Presented By: Ark Tsisserev

This presentation covers:

1. Provisions of Section 8 of the CE Code in respect to:
 1. Load calculations in accordance with 8-200 series rules;
 2. Selection of the services, feeders and branch circuits ratings (rating of the O/C devices and ampacity of conductors) based on Rule 8-104 the CE code;
 3. Demand factors applied in conjunction with electric vehicle supply equipment;
 4. Use of electric vehicle energy management system.

2. Selection of conductors ampacity based on:
 1. Conditions of installation;
 2. Voltage drop;
 3. Termination temperature;
 4. Ambient temperature;
 5. Number of conductors in a raceway.

Why this subject is presented: To assist members of the ECAA in a consistent application of the revised CE code requirements for Sections 8 and 4.
