President's Message

Hello everyone and welcome to the April edition of The Spark. Spring has arrived and I believe the majority of Albertans are anxious to get outside and get some sunshine and enjoy the great outdoors after being cooped up inside for the past four months.

Though we are all tired of talking and dealing with Covid, the reality is that we are still having to deal with restrictions for the time being. We will have to remain diligent for the time being, but there is growing optimism that with the vaccines being administered we are maybe on track to see all restrictions lifted by the end of May, according to Premier Jason Kenney's recent announcement. Let's keep our fingers crossed.

We held our Provincial Board meeting on March 18th. Some of the highlights of the meeting included a motion to accept the final draft on our revised Mission / Core Value statement. It was also mentioned that Prompt Payment Legislation will likely be enforced beginning July 1st. Where possible, Code Update seminars are being conducted as scheduled. 2020 Financials were reviewed and presented, and though revenue was down in 2020, costs were kept to a minimum and we were able to maintain a positive balance and avoid debt.

Well I am really looking forward to the upcoming AGM and Training Day being held in the month of May. I would encourage everyone to take a look at the information and registration packages available to you on our website. Again the event begins with Provincial golf tournament being held at Mt. Kidd and Mt. Lorette on Thursday, May 27th. Training Day has seven great technical sessions available on Friday, May 28th. The ECAA and Associates AGM will

be on Saturday morning, May 29th, followed by the Awards Luncheon. I would encourage everyone to attend participate. The Gala will kick off with a message from our keynote speaker, Dr. Marc Jeschke who will be discussing long term effects of electrical injuries. Gala entertainment will be provided by Gray Day Events and it promises to be a fantastic event. Again, depending on updates by Alberta Health Services, these events can all be attended via Zoom or perhaps in person. All in all it will be a wonderful time to get away to the Alberta Rockies and enjoy some of nature's beauty and still be able to join in from the comfort of your own private room as a worst case scenario.

Thank you again to Sheri McLean, Christine, Camille and Dorothy. They are putting a lot of time, effort and certainly thought into the planning of the AGM, combining virtual with reality and managing both time and space.

Thank you again to everyone for your ongoing support and involvement and we look forward to seeing you all in May. Let's stay Alberta Strong!

Respectfully,

Tim Brundage
ECAA Provincial President

This session will be held in Edmonton following AHS guidelines and restrictions.

Communities of Practice. Please join the ECAA Communities of Practice for a series of CoP zoom meetings scheduled for the 4th Wednesday of every month from **8:00 am - 9:30 am**. Next session set for **April 28th. Volunteer(s) needed** Vee from Lean Construction, CoP is looking to develop a case study for the April CoP and needs a volunteer electrical contractor who is participating in the ECAA Lean CoP, or wants to, that is committed to expanding their knowledge of lean thinking that is currently growing in the construction industry, that's predicted to mature in the next few years. Early adopters, who are unsatisfied dealing with the same old problems everyday, all day. They would need to identify a process that they know they have problems with.

Requirements:

- 3 hours of time between April 12th to 27th
- provide the people who own the process
- space to do the mapping in the shop or office and do just a little homework
- then work with Vee, over the 3 hours, to create a visual representation of the process

Please contact Vee directly if you can volunteer some time. Vaughan

Lacharite vaughan@leanmindz.com 403-461-7849

Wednesday, April 28th, 2021

8:00 AM

ECAA Lean CoP will delve deeper into the second principle of lean thinking "mapping the value stream". You will learn what to do with all this information, and how to take full advantage of the potential results by implementing improvements to the process.

- a new way to visualize your processes
- help you to discover how much waste you have in the form of handoffs
- articulate your problems
- summarize how many problems you have
- touchpoints
- lost time and totals for how many documents and information carrier systems you use in the process.

APD points apply for PEC's

PEC Courses ([2021 Course Schedule](#))

Electrical Project Management - April 14th & 15th, 2021 (Online) Instructor Phil Perry. Once given a successful bid package, you will develop an awareness of how to apply ten project management knowledge areas and five processes to derive a project charter and project schedule. From here you will then learn how to manage the project to successful commissioning and close out.

[REGISTER HERE](#)

Safety Principles - April 22nd & 23rd, 2021 (Online) Instructor Barry Lawrence. Legislation recognizes a PEC as an “Employer”. This course lays the groundwork to develop a successful safety program, and mitigate additional employer risk. We’ll learn to identify common gaps found in safety systems, simple ways to interpret legislation, and many other valuable tools including: OH&S Obligations (Employer & Worker); Employee Competency; WCB Expectations; Claims Management Strategies; CSA Z463 & Z462.

[REGISTER HERE](#)

[2021 Manual PEC Course Registration](#) - use this form to register using your complimentary course certificate or to pre register for all the courses but pay for each individually as they come up.

For more information about the program and courses please contact chryniw@ecaa.ab.ca

Industry News

Links to the National Building Code – 2019 Alberta Edition and the National Energy Code of Canada for Buildings 2017 have been updated on the Government of Alberta website - <https://www.alberta.ca/building-codes-and-standards.aspx>.

This information is being forwarded on behalf of Government of Alberta OHS Code Review 2020-23

Have your say about changes to the Occupational Health and Safety Code.

Alberta’s government continues to update and improve occupational health and safety laws to make them easier to understand and apply for employers and workers. This will help them achieve better workplace health and safety outcomes. You can help us by providing your input on proposed changes to the Occupational Health and Safety Code (OHS Code).

The OHS Code has not been extensively updated since 2009 and changes are overdue. By reviewing the OHS Code, Alberta’s government wants to ensure health and safety rules keep pace with changes to workplaces, standards, new best practices and technological advances. The review will also help streamline and simplify OHS Code requirements.

This is the first year of the [three-year review plan](#) for the OHS Code. This year, we are reviewing changes required by the recently-passed Ensuring Safety and Cutting Red Tape Act. We are also reviewing parts of the OHS Code that require the most immediate updates. We encourage you to provide your input on proposed changes to the OHS Code by filling out the [online survey](#). You may fill out all parts of the survey or only those that interest you. **Please provide your input by May 10, 2021.**

Please contact us at lbr.ohsreview@gov.ab.ca if you have any questions about the survey or the three-year review plan.

Thank you in advance for participating in the survey. Your input will help us update OHS Code rules, making them easier to understand and follow and helping ensure Albertans make it home safely from work each day.

TAKE THIS SURVEY

The Government of Alberta introduced changes to Prompt Payment Legislation. While these changes were anticipated and for the most part welcome, Alberta Infrastructure (Public Works) projects will remain outside of the prompt payment Act. That will be a fight for another day. Another outstanding issue is grandfathering of existing contracts once the legislation is enacted. ATCC has been pushing for 1 year max. General Contractor's have asked for 5.

In addition to the Amendments, a new timeline for Enactment of the Bill was also provided (but was not included in the fact sheet). Development of a Government Of Alberta (GOA) Request For Proposal for appointment of authorized Nominating Authorities (NA) will remain the same with a goal to have at least one NA in place by July 01. 2021. This will include having a roster of qualified adjudicators also appointed by this time. The GOA will then spend the next 4 months introducing the concepts and nuances of operating within the legislation to the stakeholders with the intent of enacting the legislation in October 2021.

Your ATCC executive continues to push toward the development of an industry coalition Nominating Authority with the goal to have a GOA authorized NA operational by July. To date we have commitments from ATCC, ACA, AUMA, and Consulting Engineers of Alberta. We learned yesterday that BILD (residential) will not sign the Memorandum Of Understanding and the Consulting Architects of Alberta are non-committal. We anticipate having to proceed without further delay.

Builders Lien Act Amendments Fact Sheet - April 2021

Thank you Russ Evans for providing this update.

The Government of Canada is transforming the way it does contracting through the development of a new Vendor Performance Management framework.

As part of the developmental work associated with the framework, they are seeking feedback from industries on proposed pilot materials through a Request for Information posted on their website: <https://buyandsell.gc.ca/procurement-data/tender-notice/PW-21-00950744>

The goal of establishing and implementing a new Vendor Performance Management framework is to establish an objective, structured, and reliable way to evaluate the performance of vendors on federal government contracts. Ultimately, they aim to use performance information to supplement technical proposals and the proposed pricing to inform future contract award decisions.

The Vendor Performance Management framework is being implemented using a phased approach. The first Phase is the targeted testing of the Vendor Performance Management framework through a pilot version. The pilot version of the framework has been developed and will be tested through select contracts in five commodity areas: Apparel; Marine/Small Vessels; Construction; Fairness Monitoring; and Task Based Informatics Professional Services. In advance of launching these pilots in the summer of 2021, they are seeking your feedback on the following:

- [Vendor Performance Management Pilot Overview, including KPIs and Evaluation Process;](#)
- [Proposed Scorecard.](#)

For more information on the development of the Vendor Performance Management framework, including the findings of prior consultations, please visit their webpage:

<https://www.tpsgc-pwgsc.gc.ca/app-acq/grf-vpm/grf-vpm-eng.html>

Should you have any questions, please contact Rodrigue Gilbert, VP, Public Affairs, rgilbert@cca-acc.com.

This information is being forwarded on behalf of the [Canadian Construction Association](#)

This information is being forwarded on behalf of Ernst & Young LLP

As communicated by the Minister of Infrastructure on March 31st, 2021, this review will identify potential opportunities to implement efficient and effective procurement practices for all goods and services, including complex construction projects. The objective of the review is to decrease the cost of goods, services and projects for taxpayers while ensuring quality and service. An initial step of this review is to conduct a survey with all in-scope entities. **For your completion please find below the link to the Procurement & Project Delivery Review current state survey. Follow this link to the Survey: [Take the Survey](#)** . Or copy and paste the URL below into your internet

browser: https://globaleysurvey.ey.com/jfe/form/SV_8rfgLyc0anplyns?RID=CGC_XT5Qrk9ccvZCyMz&Q_CHL=email

It is asked that you prioritize this initiative and respond to the survey no later than 5:00 PM MST Wednesday, April 14. If you are not the appropriate person to be providing insight into your procurement and project delivery, please forward to the appropriate colleague.

If you have any questions, please contact the EY team

at Miaoling.Liang@ca.ey.com or Vaibhav.Kukreja@parthenon.ey.com. We will respond to your question as soon as possible.

Canadian Occupational Safety Nominations open for Canada's Safest Employers Awards recognizing outstanding companies, individuals and service providers from across different industries for their commitment to workplace health and safety. **Nominations deadline is Friday, April 23rd. [Alberta Municipal Solar Program](#) This program provides municipalities with the opportunity to reduce their operating costs by managing their energy, lowering utility bills now and in the future. The best part is, 30 per cent of the solar PV system is funded by our program – that's up to \$1.5M. This is the final year of the Alberta Municipal Solar Program and its first-come, first-serve. **The Alberta Municipal Solar Program application deadline is April 30, 2022.**

Surviving Long Term Sequelae of Electrical Shock Hazard Exposure

By Terry Becker, P.Eng., CEMCP, IEEE Senior Member.

The electric shock hazard has been neglected. Journeyman Electricians have accepted been shocked as part of the job, a "right" of passage, a badge of honour. This has not been acceptable and Journeyman Electricians may not be aware of the long term sequela health effects of receiving multiple low voltage electrical shocks and how it may have impacted them. With respect to treatment there is only a single formal recognized treatment centre in Canada, the St Johns Rehab Centre. Electrical Injury Program. When a worker is exposed to the electric shock hazard there are two possible outcomes. A shock is received and the worker survives or they die. Electrical incidents statistics confirm that fatal electrical injuries from the shock hazard are occurring at an alarming rate, on average still once a day in North America. What is not published in electrical incident statistics reports is the number of electrical workers that may suffer from the long term effects of receiving multiple low voltage ($\leq 750V$) shocks. The medical term for this is "sequela." [READ MORE](#)

When it comes to caring for safety eyewear employees need to be provided with the education and training necessary to maintain safety eyewear if it is to be functional and last a long time. The basics require employees develop a routine that includes regular cleaning, proper use and proper storage. Coaching them to understand these 8 "do's and don'ts" will help them stay protected while getting the best value from their safety eyewear.

Click on the link below to view the full article: [Top 8 Do's & Don'ts for taking care of your safety eyewear.](#)

Congratulations to BDO for celebrating 100 year of growth and success.

Congratulations Mauro Di Tullio who celebrated 40 years with Federated Insurance on March 30th!

Schneider Electric Partners with NAIT's Centre for Grid Innovation to Bring Energy Solutions to Alberta Businesses.

NAIT's Centre for Grid Innovation.

Schneider Electric, a leader in energy management and automation, has partnered with Edmonton's Northern Alberta Institute of Technology (NAIT) to help bring phase two of the polytechnic's Centre for Grid Innovation to reality. Slated for completion this June, phase two extends the capabilities of the centre by adding new distributed energy resources (DERs) and installing Schneider Electric's EcoStruxure Microgrid Operation (EMO), providing Alberta businesses with the physical assets and technical expertise required to test their DERs.

"Distributed energy resources are becoming an increasingly favourable option for consumers and distribution entities, especially as new technologies like electric vehicles continue to grow in popularity," said Frederick Morency, Vice President of Services, Schneider Electric. "NAIT's Centre for Grid Innovation is an exciting step forward for Alberta's changing energy landscape, providing small and medium enterprises with the ability to develop, test and optimize their solutions against real-world factors. We're excited to partner with NAIT to support Alberta's growing distributed electricity sector."

Schneider Electric's EcoStruxure Microgrid Operation (EMO) and Microgrid Advisor for Energy Optimization and Economic Dispatch will be installed in the centre as part of phase two. A robust, scalable and user-friendly solution provides automatic and remote management of DERs to maximize renewable energy use. Additionally, it allows users to set up operating conditions or implement customized control schemes to allow testing in both connected and off grid mode and create grid transition scenarios.

"NAIT is proud to assist Alberta's industry in adopting and testing new technologies that will support our province's growing demand for integrating distributed energy resources," said Sandra Marocco, Vice-President Industry Partnerships and Chief Marketing Officer, NAIT. "Our partnership with Schneider Electric is crucial in developing the infrastructure that our Centre for Grid Innovation uses to support companies in developing, testing, validating, and advancing products and training in the distributed energy field."

As the role of DERs in today's changing energy landscape continues to grow, NAIT's Centre for Grid Innovation and its partners are positioned to accelerate the transformation from traditional power grids to a renewable and distributed model. Established in 2018, the centre provides partners with access to a plug-and-play microgrid to develop, test and demonstrate technologies prior to commercialization; compare energy costs and greenhouse gas emissions of various technologies, and train staff on the deployment, maintenance and operation of DERs.

Phase two will mark the completion of the centre's physical infrastructure. For more information on NAIT's Centre for Grid Innovation, please visit www.nait.ca/gridinnovation. For more information on Schneider Electric and its EcoStruxure Microgrid Operation, visit www.se.com/ca.

Provincial Board Update

A hybrid meeting was held on Thursday, March 19, 2021, at 8:30 am. Joining President Tim Brundage in person were Terry Barnett; Tim Fehr; Brian Halina; Scott Hutton; Terry Milot; Neil Moffatt; Darcy Teichroeb, PEC; and Mrs. Sheri McLean (Recording Secretary). Via zoom: Shawn Bishop (for Jason Kuziw), Edgar Garcia, Dave Hagen, Cody MacInnis, Andrew McGuire, Russell Daw, Susan Rockwood, Hans Tiedemann, Grant Wagar. Agenda and Minutes from December 4, 2020 were approved. The new Mission and value statement were approved a study on the electrical industry in Canada prepared by Netco was shared with Board. Registration package for Convention 2021 was approved ([2021 Convention Registration Package](#)). Labour AGM will be held virtually on Tuesday, May 18th; PEC AGM will be held virtually on Wednesday, May 26th. Awards luncheon and Presidents Gala will be offered via zoom and features entertainment of interest to all our members. ***Proceeds from the virtual gala entertainment will be setup as a donation to support ECAA members who have struggled with Mental Health.**

Correspondence items included a letter to Minister Panda. Service Alberta is the Ministry taking the lead on prompt payment initiatives. Infrastructure and Transportation don't have to follow the legislation (letter to Minister Panda, Infrastructure asked for harmonization amongst Ministries to follow Prompt Payment legislation). Tentative enforcement date is July 1, 2021. Alberta Trade Contractors Coalition is putting a bid to be one of the adjudication authorities. Letter sent from President Brundage to Sustainable Energy and Agriculture Association of Alberta (SEAAA) supporting their application to the Sectoral Initiative Program with Employment and Social Development Canada for "*Rebuilding Communities Capacity through Agriculture, Electrical & Renewable Energy Programs*".

A letter was received from CECA stating that Ontario has dropped their membership in the national association. Letter sent to ECAO asking them to reconsider as Alberta feels there is a need for a national body representing the electrical industry in Canada. Request received from Safety Codes Council for a PEC to be included in the master's working group; as well as volunteers to participate in a stakeholder meeting regarding the master's program.

Legal Assist joined the meeting at 9:25 am making a presentation on how they can assist our membership with legal services. January financials were reviewed; BDO joined the meeting at 10:00 and walked Board through the 2020 year-end financials. List of outstanding memberships were reviewed. Request for Don Kuziw, Member Relations to make phone calls to contractors and associates on the list. Sheri will send exit email to PEC's.

The following members were approved in their respective categories: Associate – Axe Fire Protection (Edmonton); Robertson Electric Wholesale (Edmonton); Team Pawluk – Legal Shield Independent Associates (Calgary); Umbra Engineering (Edmonton). Journeyperson – Michael Dechant (Grande Prairie); Jeremy Hiebert (Cochrane); Cameron Powles (Edmonton); Marris Romaniuk (Fort McMurray); Tyler Lushman (Peace River). Retired PEC – Clem Gratton. Approved Professional Electrical Contractors (PECs): Robert Cordsen (PEC #388), Karl Robertson (#389), Chad Kimmel (#390).

Chapter and Committee reports were presented. Thank you to all our members who continue to participate on the zoom Chapter meetings. Dave Hagen introduced Grant Wagar as his replacement on the Board. Welcome Grant!

Update to Board on NAIT's two-year electrical diploma recently approved by the Minister. PAC reviewed curriculum, similar to the electrical one. NAIT will begin taking students in September for the diploma program. Technical training will be completed in two years; apprenticeship program can be entered into following completion of diploma. Alternate education path to becoming a journeyperson electrician. Course outline review continues with a fall 2022 target. Red Seal occupational standards also being reviewed. AIT sent notices to 9500 apprentices suspending period exams and attendance requirements from January – July 2021.

It was noted that material prices are increasing due to shortage of product. Marketing campaign will focus on (1) on-line courses available; (2) PEC program. A social media challenge will roll out soon. Terry Barnett moved and Neil Moffatt seconded acceptance of this report. There is optimism in the travel industry that the out-of-country convention to Africa will proceed. 40-45 people have signed up.

ECAA has a new on-line training portal. The revised Ethics course turned out very well and is now live. A meeting was held with the course instructors last week. Code update training is being provided. ECAA is promoting Terry Becker's arc flash training. The PEC AGM will be held virtually on Wednesday, May 26, 2021 (prior to the golf tournament). The PM Elec is currently in a holding pattern.

ECAA 60th Anniversary is November, 2022. Board approved approaching Calgary Chapter to host as part of their Winter Gala. Rewritten ByLaws approved for circulation to Past Presidents and then Membership for comments and approval at the Annual General Meeting. Meeting adjourned at 12:05 pm.
